jQuery MySQL Ajax GitHub HTML CSS
Bootstrap

PROJECTS

E-Commerce web app with MERN stack ↗
- I have built a cake store E-commerce web app with a MERN stack. The main objective of this cake store is to provide all the details about cakes. This is a completely functional web app where one can visit, register, purchase, and make transactions with cake products, and one can also manage cakes, cake types, customers, bills, and sales details. This will provide a platform for small as well as large cakeshops to manage their business and get available to the customers through online delivery.

Portfolio Website ↗
- I have built a Personal Portfolio or website that looks great on a mobile, tablet, and desktop (so in other words, I have made it responsive!). I have done this with HTML and CSS, and with a small bit of JavaScript. I have done this to learn/improve my CSS and HTML skills.

Calculator using JavaScript ↗
- I have built a Calculator website that looks great on a mobile, tablet, and desktop (so in other words, I have made it responsive!). I have done this with HTML and CSS, and a bit of JavaScript. I have done this to learn/improve my CSS and HTML skills.
